ALLTAB 2.0

(version 2.3.2016)

Quick Start Guide

distributed by AQUA LUNG®

Important Safety Information

- You must read the User Manual of the Alltab tablet, and the Samsung Galaxy Tab S2 before using your Alltab. These documents contain important safety information.

- **WARNING! THIS IS NOT A DIVE COMPUTER.** Make sure that you use proper instrumentation including a depth gauge, compass, submersible pressure gauge, timer or watch, and have access to decompression tables whenever diving with Alltab.

- **WARNING!** Using any software or application on Alltab is not a substitute for proper dive training, navigational equipment or back-up instrumentation.

Power on & Lock off

- Push the start button (uppermost button on the side of the tablet) for appr. 5 s.
- When in "sleep mode", a quick push on the button is sufficient
- Push down on the screen and slide upwards
- The tablet goes into sleep mode if not unlocked within appr. 10 s.

## **3** Practice with the touchscreen

- You need to press the outer membrane "through" the thin layer of liquid to make contact with the touchscreen
- Push: Only a quick touch on the touchscreen is needed (if pushed too long, the screen thinks you want to move the icon around)
- Slides: Press down to make contact with the touchscreen, then slide
- Practice for 5 min. on your couch

4. Getting started & downloads

- Go to the "Alltab info" app to register your device, get your user ID for the Allure data collection software & find user instructions for the tablet and softwares.
- In "Play Store" you can download apps, softwares, games etc.
- Create your own (or use your existing) Google account the first time you use Play Store on your Alltab.

5. Settings & Home button

- In "Settings" you can adjust screen brightness, sound, wifi etc. You'll also find quick settings by sliding down from the top of the screen
- The home button is found at the bottom of the screen

6 **Wireless charging**

- Place the smooth side of the charger (NOT the side with the rubber ring) in the slot at the back of the tablet
- When the blue LED starts blinking, the tablet is charging
- Use only Alleco-approved chargers, batteries, and cables. Unapproved chargers or cables can cause the battery to explode or damage the device.

7 Bubble & camera

- Don't worry – a bubble is supposed to be there
- If you want, remove it as shown in user manual

- Pictures with built-in camera are blurred. We recommend using an external actioncamera (can be wirelessly linked also under water)

8 Important!

Rinse your tablet with fresh water after each dive.

Enjoy your dive!
