

Attaching the bungee cord for the Allhub antenna to your Alltab

Insert the end of the strap through one of the round holes in the Alltab.

Loop the cord through all the four holes, as shown in the picture.

3 Attach the end of the cord securely to the plastic clip, as shown in the picture.

4 Attach the disc at the end of the antenna, as shown in the picture below and secure it with the hook to one of the round holes.
